How To Set Up and Offer Financing to Customers?

Part 3

Introduction

Businesses that offer flexible financing demonstrate 20-30% increase in conversion rates on average!

In today's competitive marketplace, it has become essential for businesses to offer flexible financing options to their customers. These options can help businesses enhance customer satisfaction and drive revenue.

Suppose a customer finds their desired product available with two different businesses. One business offers financing options, while the other doesn't. Which business do you think the customer will choose? Naturally, it would be the one that provides all-in-one funds the customer can afford, making the purchase process smooth and convenient.

The answer lies in the concept of Customer Financing and its significance in the customer journey!

A Deep Dive into Customer Financing

Customer financing is a solution that businesses offer to customers to allow them to purchase products or services on credit or through installments. It is a way for businesses to provide flexible payment options to their customers, making it easier for them to afford the purchase.

Customer financing can be offered directly by businesses or through third-party financial institutions. It can be structured in various ways, such as interest-free installment plans, deferred payment options, or loans with competitive interest rates.

Data-Driven Insights into Customer Financing Trends

According to Research by PYMNTS, 43% of customers choose retailers based on preferred customer financing options.

Financetwist.com

Financetwist, for example, is a smart, AI-based customer financing SaaS platform that tailors payment plans to fit the financial needs of the customers. It uses the AI approach to enable intelligent, dynamic, and personalized financing solutions for businesses and their customers. By leveraging AI algorithms and machine learning models, Financetwist will continue to help over various sectors - e-commerce, retail, healthcare, education, hospitality, and many more.

According to the Finance & Leasing Association (FLA), consumer financing is responsible for 1 in 3 March 2020 completed by customers.

This indicates that customers are actively using credit to bridge the gap between desire and affordability. Customer financing is becoming popular because it offers a convenient way for customers to purchase items they may not have the immediate funds for. It makes the purchase more accessible and more affordable by adopting customer financing solutions.

Why It Pays To Offer Financing to Customers

Offering customer financing options is not merely about adding another payment method to your business. It's a strategic decision that can have a long-lasting impact on your business. Here are the following points:

Combat Sticker Shock
Financing down a large upfront amount into easy, manageable payment plans makes buying a product or service more manageable.

Enable Larger Purchases
Customer financing can help you step over limits; this are more likely to upgrade to premium products or subscriptions or services. This leverages the average order and transaction size.

Improve Cash Flow
With the right financing partner, businesses can offer customers time to pay for their purchases while receiving immediate payment. This can help improve cash flow.

Differentiate the Brand
Flexibility in payment can be a key differentiator in competitive markets. Business-offering flexible payments position themselves as customer-centric and customer-friendly.

Build Customer Loyalty
Flexible financing experiences tend to better customer loyalty and net promoter scores (NPS). Secondly, having an ongoing payment relationship can help with customer engagement and retention.

The remarkable benefits of customer financing make business owners ecstatic!

Offering customer financing options is a wise and thoughtful decision to achieve better business results. It may seem like a complex task, but with the right guidance and support, you can easily navigate the process. Financetwist is here to help you every step of the way, from the process of implementing customer financing into day-days.

- Step 01 — Financial Goals
- Step 02 — Choosing a Model To Offer Financing to Customers
- Step 03 — Selecting a Customer Financing Solution
- Step 04 — Setting Up Your Offer of Financing to Customers
- Step 05 — Integrating Financing into the Workflow
- Step 06 — Launching And Monitoring Performance

The 1st edition of this white paper thoroughly explains the first step, which is Defining Financial Goals. Let's begin by exploring the different customer financing models and the key deciding factors behind setting this up.

financetwist.com

Step 1: Defining Financing Goals

Defining financing goals for customer financing is a strategic one. Before deciding on the technical aspects of financing, such as platforms, terms, or APIs, it's crucial to establish clear objectives. These goals will guide your decision-making and help you measure the success of your financing program. Let's explore how you can guide and impact the most important decisions. For example, a small business may aim to increase sales by 20% within the first year of offering customer financing.

Financing That Works for Everyone—Including You

The following are the most common strategic goals businesses aim to achieve when they decide to offer financing to customers, and how financing can help.

Increase Conversion Rates

Customer financing options remove the friction of upfront payments, especially for high-ticket items or purchases. The ability to "buy now, pay later" (BNPL) or pay in timely installments boosts the perceived value and affordability of the purchase.

Tactic: When a business offers monthly payment options, it can highlight the low monthly cost rather than the total price effectively. For example, "Complete your home remodel for just $150/month with financing."

Strengthen Customer Loyalty and Repeat Purchases

Customers with positive purchase experiences are more likely to return and make repeat purchases, thereby increasing customer loyalty.

Tactic: Creating brand campaigns with personalized financing options for previous customers to encourage repeat purchases.

Improve Customer Experience And Accessibility

Customer financing makes it more flexible and calling terms to customers according to their financial situations. This is especially important for customers who may not have the immediate funds for a purchase but can afford it with manageable payments. This advantage to enhance customer experience and provide accessibility.

Tactic: Pairing financing with transparent terms and conditions with no hidden costs to improve trust.

Accelerate Payment Reliability And Cash Flow

Delayed payments are a major strain in B2B industries. The decision to offer financing to customers allows businesses to receive payments upfront while giving their clients the time they need to pay. This can improve cash flow and reduce accounts receivable risks.

Tactic: Offering customer financing options with flexible terms like business services provided monthly payments from a financing partner like Financetwist.

Step 2: Choosing a Model To Offer Financing to Customers

The right type of financing for a business depends on many factors - industry, cost, how customers make, etc. Each type has its benefits, trade-offs, and ideal use cases.

In-House Financing

In-house financing means the business itself provides credit to its customers rather than relying on third-party lenders. It can be structured in various ways, such as short-term credit or long-term installment plans.

With in-house financing, the financing process becomes quicker and more streamlined. This can be a significant advantage for businesses that want to offer fast and convenient financing to customers since it removes the entire risk of non-payment.

Best For:
Businesses with sufficient infrastructure and capital to manage financial risk. Examples include automobile, HVAC services, medical and dental services, education and training, etc.

Advantages

- Complete control over the financing process, repayment terms, and interest rates.
- A chance to increase revenue through interest amounts.
- Improvement of client-retention relationships.

Disadvantages

- High risk if customers default.
- Requirement of robust internal infrastructure.
- Complex regulatory requirements.

Third-Party Financing

Third-party financing means partnering with a financing institution or company to finance customers. The business partners with this financing company, and customers can apply and make the financing process on behalf of the business.

financetwist.com

Third-party financing services are integrated into a merchant's app or website to offer financing to customers. The lender makes the credit checks on customers and approves the loan or financing option.

The BNPL provider manages the installments and ensures the merchant receives the payment upfront. It often integrates with payment gateways and e-commerce platforms to offer a seamless checkout.

Best For:
Businesses that do not want to take on financial risks.

Advantages

- Improved cash flow as the business receives upfront payments.
- Low or no financial risk for the business.
- Easy integration with existing platforms.

Disadvantages

- Third-party providers charge a fee or acquire a percentage of the transaction.
- Reduced control over customer experience and approval decisions.

Buy Now, Pay Later (BNPL)

Buy now, pay later is a short-term credit option that lets customers pay for a purchase in installments, usually without interest if paid on time. It is typically interest-free for customers. It's a flexible way for customers who have smaller budgets.

The BNPL provider manages the installments and ensures the merchant receives the payment upfront. It often integrates with payment gateways and e-commerce platforms to offer a seamless checkout.

The BNPL provider manages the installments and ensures the merchant receives the payment upfront. It often integrates with payment gateways and e-commerce platforms to offer a seamless checkout.

Best For:
Businesses and retail businesses catering to budget-conscious consumers.

Advantages

- Increased customer loyalty.
- Versatile data-driven insights on purchase behaviors and preferences.
- An additional source of income from shared revenue.
- Enhanced customer reach through the lender's network.
- Enhanced reputation leading to more trust from customers.

Disadvantages

- Customers may not be approved based on their credit history.
- Negative customer experiences can reflect on the business.
- Risk of customer default.
- There is a risk of financial risk if the card provider does not perform well in the market.

Credit Card Partnerships

In credit card partnerships, businesses partner with credit card providers or banks to issue co-branded credit cards. The business can offer its customers cards offer promotional financing offers and incentives, increasing customer loyalty.

Same as branded cards offer redeemable points, which can be used to buy products or services from the business's store. This helps the business acquire new customers and loyalty.

Best For:
Large businesses or retailers that have repeat purchase potential

Advantages

- Increased customer loyalty.
- Versatile data-driven insights on purchase behaviors and preferences.
- An additional source of income from shared revenue.
- Enhanced customer reach through the lender's network.
- Enhanced reputation leading to more trust from customers.

Disadvantages

- Customers may not be approved based on their credit history.
- Negative customer experiences can reflect on the business.
- Risk of customer default.
- There is a risk of financial risk if the card provider does not perform well in the market.

Key Decoding Factors: Final Thoughts

Choosing a customer financing model is not set in stone. A business may opt for an in-house financing model to exercise complete control over customer experience. But as it grows, it may switch to third-party financing to reduce the risk of defaults. Or it may enhance its customer financing experience and offer flexible payment options.
